## PROFILE

B.Sc. IT student and self-taught developer with a passion for creating both technical systems and interactive experiences. Experienced in full-stack development, AI-based tools, and game systems design . Skilled at turning abstract concepts into functional, optimized code. Focused, disciplined, and capable of working independently or within teams to deliver complex projects under tight timelines.

## PROJECT EXPERIENCE

- Cockroach Engine - C# / Custom Framework  
Lightweight raycast-based engine (DDA rendering, collision, shading).
- Project Virana - Unity / C#  
Narrative walking simulator exploring environment-based storytelling.
- Face-Recognition Attendance System - Python / OpenCV  
Real-time attendance app using facial recognition and CSV logging.
- Snap Editor - Python / FFmpeg  
Quick video trimming and merging tool for creators.
- Full-Stack Web Apps - React / Node / PHP / PostgreSQL  
Built CRUD apps with authentication and API integration.
